

## PROJECT SELF EVALUATION

**Project:** Elementary Theatre Class

**Your Name:** Molly Cameron

**Your Role:** Instructor

**Place an "X" in the appropriate column for each row, indicating your performance in the stated category.**

**If this was not a collaborative project, leave the rows for "Collegiality & Collaboration" and "Overall Dependability" blank.**

Frequency of Rating	< 1% of Scores	1-10% of Scores	80% of Scores Should Fall Into These Rankings		1-10% of Scores	< 1% of Scores
Rating	Truly Inspirational	Extremely Impressive	Above Average	Average	Struggling	Completely Unacceptable
Collegiality & Collaboration			X			
Raw Talent / Ingenuity			X			
Commitment & Dedication			X			
Performance / Execution				X		
Overall Dependability			X			

**Describe your greatest strengths / contributions to the project:**

I teach a class of nine students all in elementary school. The class meets once a week for an hour. During this time I teach them basic theatre skills such as teamwork, improvisation, memorization, blocking terms, and basic character development. Depending on the week I lead them in theatre games, teach a lesson that I have developed for one of my methods classes, or assist with rehearsal. I am also the assistant director for their final piece which is performing a short play. I work with my co-instructor, Bruce, to design and direct the play. This year we are performing a play that Bruce wrote so we agreed that he should be the primary director. I am on time and prepared for each class and am dedicated to my student's success.

**Describe how you could have made a stronger contribution to the project:**

There have been some weeks where I have not prepared as much as I could have. For example, I would simply plan to play a theatre game and decide once I was there instead of choosing what game we would play in advance. I could also work on my time management. I will sometimes spend too long on one activity so that I do not have enough on what is really important. If I prioritize my activities and time this can be avoided in the future.
